## Progress &amp; Contribution

| Contributor                  | User Story                        | Task                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|------------------------------|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Nurjahan<br>Ahmed<br>Shiah   | M1,<br>M2(USA1),<br>M3(USF.1)     | <p>&gt; <b>Project Setup:</b> Set up the project, including the repository structure, Docker Compose orchestration for the 8-service microservices architecture (auth, users, groups, sessions, resources, courses, recommendations, admin), the API Gateway routing layer, and the development environment configuration.</p> <p>&gt; <b>Logo-Design:</b> Designed and implemented the StudySync logo (with FIGMA) component for the visual identity and used across the navbar, sidebar, and landing page, including the icon mark and wordmark styling consistent with the app's theme (dark-light mode).</p> <p>&gt; <b>Sign-up Page:</b> Built the signup/registration flow, including: role selection UI, real-time password strength validation, form state management and API integration, a post- registration welcome modal personalized by name and selected role, client-side validation and error handling for duplicate emails and invalid input.</p> <p>&gt; <b>Dashboard Page:</b> Built the authenticated dashboard, including: a stat overview grid (Groups, Sessions, Recommended, Role), empty-state cards for groups, sessions, recommendations, and courses, designed to handle a new user, integration with the shared Sidebar and ProfileButton components for consistent navigation, responsive layout using the app's design token system</p> <p>&gt; Wrote the project <b>README</b>, covering setup instructions.</p> <p>&gt; <b>Testings:</b> Wrote curl-based integration test suites for signup and dashboard features.</p> |
| Uzma Alam                    | M3,<br>US- C.1                    | Implemented the session scheduling service for StudySync. The service allows group leaders to create study sessions with full field support, including title, date and time, duration, location, and description.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Ahmed<br>(Saaram)<br>Mustafa | M3,<br>M4<br>(US-E.1,<br>US-E.2)  | Implemented the Notification Centre and Announcement Board features for StudySync. Added backend support for retrieving user notifications, tracking read/unread status, and updating notifications when users mark them as read. Implemented the frontend notification feed/bell so users can view recent updates and unread notifications. Also implemented the announcement board, allowing group leaders to create group announcements that appear in the group feed and notify members when a new announcement is posted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Muhammad<br>Fahad Sohail     | M3,<br>US-C.5<br>M3/M4,<br>US-D.3 | <p>Implemented session detail and RSVP endpoints, allowing group members to view session details and submit RSVPs through the backend service.</p> <p>Implemented resource download and inline file preview. Added a backend endpoint to fetch individual resources and a frontend page to browse, search, filter, download, and preview files across all user groups.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|                 |             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-----------------|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                 |             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Nusayba Hossain | M1 (US-A.2) | <p>Implemented US-A.2 login frontend.</p> <p>Changes:</p> <ul style="list-style-type: none"> <li>• Added /login page.</li> <li>• Login submits to /auth/login through the API Gateway.</li> <li>• Stores JWT and user info in localStorage using existing StudySync keys.</li> <li>• Redirects to /dashboard on success.</li> <li>• Shows an error message for invalid credentials.</li> </ul> <p>Tested:</p> <ul style="list-style-type: none"> <li>• Valid login returns JWT.</li> <li>• Invalid login returns 401.</li> </ul> <p>Frontend builds successfully with Docker.</p> |
| Ali Shandhor    | US-B.1-3    | <p>Contributed to the Study Groups feature for StudySync by implementing and improving key group management functionality. Worked on enhancing the user experience for finding, joining, leaving, and managing study groups while ensuring appropriate access rules and membership handling. The implemented features are currently being tested and are on track for the next milestone.</p>                                                                                                                                                                                     |
